**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Notice of Availability.

**SUMMARY:** The Bureau of Land Management (BLM) announces the availability of the Record of Decision (ROD); and Approved Resource Management Plan Amendments (ARMPAs) for the Rocky Mountain Region Greater Sage-Grouse (GRSG) sub-regions of Lewistown, North Dakota, Northwest Colorado, and Wyoming; and Approved Resource Management Plans (ARMPs) for Billings, Buffalo, Cody, HiLine, Miles City, Pompeys Pillar National Monument, South Dakota, and Worland. The Assistant Secretary for Land and Minerals Management of the U.S. Department of the Interior signed the ROD.

**SUPPLEMENTARY INFORMATION:** This ROD; the ARMPAs for the Rocky Mountain Region GRSG sub-regions of Lewistown, North Dakota, Northwest Colorado, and Wyoming; and the ARMPs for Billings, Buffalo, Cody, HiLine, Miles City, Pompeys Pillar National Monument, South Dakota, and Worland were developed through a collaborative planning process in order to incorporate land use plan level measures into existing BLM land use plans to protect, enhance, and restore GRSG and their habitat by reducing, eliminating, or minimizing threats to GRSG habitat in the context of the BLM’s multiple-use and sustained yield mission under FLPMA.

The ARMPAs and ARMPs approved by the ROD include land use allocations that limit or eliminate new surface disturbance in GRSG Priority Habitat Management Areas (PHMA), while minimizing disturbance in GRSG General Habitat Management Areas (GHMA).

The Billings and Miles City ARMPs also include Restoration Habitat Management Areas

(RHMA), where certain management actions in these areas provide for a balance between ongoing and future resource uses, so that habitat is maintained, while also allowing for residual populations in impacted areas to persist. The Northwest Colorado ARMPA also includes Linkage and Connectivity Habitat Management Areas (LCHMA), which have protections to facilitate the movement of GRSG and maintain ecological processes.

In addition to establishing protective land use allocations, the ARMPAs and ARMPs implement a suite of management decisions, such as the establishment of disturbance limits, GRSG habitat objectives, mitigation requirements, monitoring protocols, and adaptive management triggers and responses, as well as other conservation measures throughout the range.

The cumulative effect of these measures is to protect, improve, and restore GRSG habitat across the remaining range of the species in the Rocky Mountain Region and provide greater certainty that BLM land and resource management activities in GRSG habitat will lead to conservation of the GRSG and other species associated with the sagebrush ecosystem in the region.

The ARMPs (plan revisions) approved by the ROD also provide updated land use plan management direction for all BLM program areas, including but not limited to, air quality, fish and wildlife, cultural, lands and realty, livestock grazing, minerals and energy, recreation and visitor services, soil and water, special management area designations (including Areas of Critical Environmental Concern), travel and transportation, vegetation, visual resources, wild horse and burros, land with wilderness characteristics, and wildland fire management.

The ARMPAs approved by the ROD amend the following BLM Resource Management Plans (RMPs), completed in the year indicated:

- Headwaters RMP (1984)

The Northwest Colorado and Wyoming Draft Land Use Plan Amendments (LUPAs)/Draft Environmental Impact Statements (EISs) and Proposed LUPAs/Final EISs included proposed GRSG management direction for National Forest System lands. However, the U.S. Forest Service (USFS) has completed a separate ROD and Land and Resource Management Plans under USFS planning authorities. Management decisions within the ROD and ARMPAs apply only to BLM-administered lands.

Across all sub-regions in the Rocky Mountain Region, the ROD, ARMPA and ARMPs amend and revise existing land use plan decisions on approximately 23 million BLM-administered surface acres.

Notices of Availability (NOA) for the Rocky Mountain Region GRSG Proposed LUPAs and RMPs/Final EISs were published in the Federal Register on May 29, 2015, which initiated a 30-day protest period and a 60-day Governor's consistency review period.

The BLM received 149 timely and valid protest submissions across all Rocky Mountain proposed RMPs and LUPAs/Final EISs. All protests have been resolved and/or dismissed. For a full description of the issues raised during the protest period and how they were addressed, please refer to the Director's Protest Resolution Reports, which are available at the following website:

[http://www.blm.gov/wo/st/en/prog/planning/planning\\_overview/protest\\_resolution/protest\\_reports.html](http://www.blm.gov/wo/st/en/prog/planning/planning_overview/protest_resolution/protest_reports.html)

The BLM received notifications of inconsistencies and recommendations as to how to resolve them during the Governor's consistency review period from the States of Colorado, Montana, North Dakota, South Dakota, and Wyoming. On August 6, 2015, the BLM State Directors for Colorado, Montana/Dakotas, and Wyoming sent notification letters to their respective States as to whether they accepted or rejected their recommendations for consistency. The States were then given 30 days to appeal the State Directors' decisions. The States of North Dakota and South Dakota appealed the BLM State Director's decisions. The BLM Director affirmed the State Director's decisions on these recommendations as the recommendations did not provide the balance required by 43 CFR 1610.3-2(e). The Director communicated his decisions on the appeals in writing

to the Governors concurrently with the release of the RODs. The Proposed RMPs and LUPAs/Final EISs were selected in the ROD as the ARMPAs and ARMPs, with some minor modifications and clarifications based on protests received, the Governors' consistency reviews, and internal agency deliberations.
